** = Commercial / Fishing C-card. Charts contained within this C-card range in scale from 1:150,000 to 1:600,000. They are designed for offshore navigating and are not intended for navigating in confined waterways. Ideal for the fisherman as these charts contain all bottom contours.

*** = Cruising C-cards. Charts contained within these C-cards range in scale from 1:50,000 to 1:150,000. They are designed for coastwise navigation and are not intended for navigating in confined waterways. Ideal for the mariner that is very familiar with the area or who is just traveling through and does not require other detailed C-cards.

Warning!

Navigators must always remember that C-MAP Electronic charts are produced using official Hydrographic Office (HO) charts and under the controls of an ISO 9002 certified quality system. They are accurate to the best of our knowledge, and any inconsistencies found are generally due to undetectable limitations in the HO charts themselves.

C-MAP electronic charts are NOT currently considered legal replacements of official HO charts and so should be used only as supplements to these, together with prudent navigation habits.

Where due, Royalty Charges are included in C-CARD prices and paid to National Hydrographic Authorities.

P = Precision; C = Cruising; F = Fishing; LOCAL = \$99 USD; STANDARD = \$199 USD; WIDE = \$349 USD
